

S74F

Screenener

HERBST S74F SCREENER

Built for high-output screening applications

- 2.8 m × 1.2 m twin deck screening box
- Tracked undercarriage
- 36 kW diesel powerpack
- Speed-controlled feed conveyor
- High-capacity 3-way material separation
- Extended conveyors for larger stockpiles
- Built for heavy-duty recycling applications
- All 3 conveyors fold hydraulically for transport
- Feed conveyor lowers for transport
- Transport-efficient design
- Approx. unladen weight: 12,360 kg

S74F Applications:

Recycling, Demolition,
Construction, Quarrying,
Aggregate Processing,
Topsoil Screening

Materials Processed:

Aggregate, Sand &
Gravel, Demolition
Waste, Topsoil, Compost
Crushed Material

S74F Overview

The Herbst S74F Screener is a high-capacity tracked screening plant designed for demanding recycling, aggregate and material processing applications. Featuring a 2.8 m × 1.2 m twin deck screening box and extended conveyor system, the S74F is built to deliver increased throughput and larger stockpile capacity on site.

Designed with productivity and transport efficiency in mind, all three discharge conveyors fold hydraulically for transport, while the feed conveyor lowers hydraulically to reduce overall transport height and simplify site movement.

Its heavy-duty tracked undercarriage and efficient Yanmar diesel powerpack allow the S74F to operate reliably across a wide range of applications including demolition waste, aggregates, topsoil and recycled materials.

Built for high-output screening, the S74F combines heavy-duty design, strong material handling and straightforward operation in one versatile machine.

 **Versatility.** Handles aggregates, recycling and screening applications.

 **Innovation.** Extended conveyors with folding transport design.

 **Performance.** High-capacity screening with larger stockpile output.

S74F Technical Specifications

Drawings & Key Dimensions

Key Specifications

Transport Length / Width / Height (mm)	9883 / 2352 / 2875 (32' 5") / (7' 9") / (9' 5")
Working Length / Width / Height (mm)	10601 / 10318 / 3282 (34' 9") / (33' 10") / (10' 9")
Screen Deck Size (mm)	2800 × 1200 mm (9' 2" × 4')
Feed Area / Hopper	Approx. 3000 × 1200 mm (9' 10" × 4')
Screening Media Options	Multiple options available
Stockpile Height - Oversize / Mid / Fines	2976 / 2800 / 2800 (9' 9") / (9' 2") / (9' 2")
Powerpack	36 kW Diesel
Undercarriage	Tracked
Approx. Unladen Weight	12,360 kg

Materials Processed:

- Aggregate
- Sand & Gravel
- Crushed Concrete
- Demolition Waste
- Topsoil
- Compost

S74F Applications:

- Recycling
- Demolition
- Construction
- Quarrying
- Aggregate Processing
- Topsoil Screening
