

DIMENSIONS

FEATURES & BENEFITS

- 700 x 400 Jaw Crusher
- Direct Feed Hopper - Hardox lined
- Folding Discharge Conveyor
- Inspection Platform
- Tracked Undercarriage with Dog Lead Control
- Yanmar 2.2L Powerpack—Stage 5
- An efficient, diesel powered Hydraulic system throughout
- To be loaded by excavator, or direct from a crusher
- Compact Design / Easily Transported / Easily Containerised

Product Leaflet

Crusher
C7040

A 700 x400 Jaw crusher for processing a wide variety of materials including concrete, rubble and recycled hardcore. The material is fed directly into the jaw chamber. This hopper is lined with Hardox for long life. The crushed material is then discharged onto the conveyor, which comes complete with Over Band Magnet as an option. Crush size is easily altered by hydraulic control.

The machine is built on a Heavy Duty Chassis with Tracked undercarriage for simple manoeuvrability on site. The 54kw Stage 5 Engine Unit offers plenty of power for hydraulics. Simple design and controls for operation, make things easy for the operator.

With its' compact design, low weight and robust performance, the C7040 is ideal for all types of site work and smaller projects where access may be limited.
